## WELCOME TO SOFTWARE WITHOUT THE HARDWARE COSTS

Say goodbye to large up-front software costs and hello to innovation that can help drive your business productivity. T-Suite® lets you connect eligible staff to world-class business software for a monthly fee whether they log on in the office, at home or from a client's site\*.

It means they can more easily access up-to-date software and business information.

### GET THE LATEST SOFTWARE

## BENEFITS OF USING MICROSOFT OFFICE 365 IN YOUR ORGANISATION

Microsoft® Office 365 for enterprises brings together the latest versions of trusted and familiar software for businesses of different sizes and varying IT needs. Built on Microsoft tools, it delivers cutting edge communication and collaboration tools with the savings of pay-as-you-go, per-user pricing.

Customers can choose from a range of plans and options – all with the same 99.9% service availability with service credits if service levels are not met, anti-virus and anti-spam solutions and 24x7, IT level support over the phone, the web or email – to more cost-effectively tailor their services to each staff member's needs. Customers' staff will be able to access the latest Office software securely over a web connection, from compatible devices, at almost any time\*

## WORK TOGETHER, WORK SMARTER

Office 365 gives customers a wide range of smart new collaboration tools to help their team work on projects together.

Depending on the Office 365 suite or individual application they choose, they can hold online meetings and quick, informal conversations, plus stakeholders will be able to view and edit documents simultaneously for fool-proof version control. Shared calendars, contacts and tasks make arranging meetings and managing projects easier, while online My Sites and Teamsites make it easy to share essential information, files and documents without distribution hassles.

## FEATURES THAT SET YOU FREE

### ✓ Enterprise-grade security

Office 365 helps protect their email environment with layered, anti-virus and anti-spam solutions that are automatically active whenever a user logs on. This ISO 27001 certified security protects their users and their systems.

### ✓ Mobile access<sup>1</sup>

Access Microsoft® Exchange Online with automatically updated email, calendar, and contacts across a range of compatible mobile devices including iPhone™, Android™ phones, BlackBerry® smartphones<sup>2</sup>, Microsoft Windows Mobile®, and Windows® Phones.

Plus you'll have easily synced mobile Outlook email with 25GB of mailbox storage, 25MB attachments and shared calendars.

### ✓ Collaborate more effectively

Get the tools you need to make the internet work for you – provide and manage information centrally online, share contacts and calendars, send large files, host and join online meetings, and communicate in real time from desktop to desktop.

### ✓ Efficiency and Control

Providing Office 365 on the cloud eliminates the need for their in-house IT team to manage communication and collaboration servers – without taking the control out of their hands. The system deploys patches, security updates and back-end upgrades for customers, while they decide when to deploy major updates across their Microsoft® Exchange Online and Microsoft® SharePoint Online platforms. Help reduce unplanned costs of ownership by fixing their monthly per-user fees.

### ✓ 99.9% service availability<sup>3</sup>

Customers count on their software, so Office 365 aims for the highest levels of reliability, availability and performance with 99.9% service availability with service credits if service levels are not met<sup>^</sup>. 24 x 7 IT level support available over the phone (1800 TSUITE), online (via T-Suite) or email.

### ✓ Pay as you go

You'll be able to enjoy added purchasing flexibility and cost control, plus robust management and deployment tools, to adapt to your changing business needs with greater IT control.

^ Service levels do not apply during excluded downtime (being downtime less than 10 minutes in length) and scheduled downtime (which will be scheduled between 12 am to 7 am (AEST)). 1. Access from mobile devices depends on carrier network availability. 2. Users of BlackBerry® Internet Service get push email and can add calendar and contacts to their BlackBerry device through a wired sync with Outlook on the PC. 3. Service levels do not apply during excluded downtime (being downtime less than 10 minutes in length) and scheduled downtime. Refer to Telstra's T-Suite Our Customer Terms for information on the service levels, the exclusions, and how to claim service credits. For complete terms and conditions, including our rights to update the service or change the functionality, and the ability for you to change Microsoft Online Services or change licence numbers, see T-Suite Our Customer Terms. † Each Microsoft® Office 365 (Plan P1) trial is limited to 10 seats and expires after 30 days. You may only receive one trial. You may, during or within 30 days of the expiring of the trial, choose to convert your trial users to a paid subscription for any Office 365 suite or any of the individual components of the Office 365 services. No early termination charges apply for not converting to a paid subscription. User information and data, including mailbox content, hosted data and other related settings will be deleted within 30 days after the expiry of the trial unless you have purchased a subscription for the Office 365 (Plan P1) suite or any of the individual components of the Office 365 (Plan P1). If you choose to purchase from a different suite to that trialed, your existing account and service data will not be migrated and will be deleted. Telstra may in its discretion cancel the Trial prior to the end of the 30-day period. For complete terms and conditions, including information on trials, see T-Suite Our Customer Terms. ®Registered trade mark of Microsoft Corporation Limited. ® Registered trade mark of Telstra Corporation Limited ABN 33 051 775 556. iPhone is a trade mark of Apple, Inc. ® The BlackBerry and RIM families of related marks, images and symbols are the exclusive properties and trade marks or registered trade marks of Research In Motion Limited – used by permission.
